

OBJECTIVE

To apply my skills as an industrial designer to assist in bringing well thought out, useful, and beautiful objects to market.

EDUCATION

BFA Industrial Design
May, 2008
Rochester Institute of Technology
Rochester, New York

CAPABILITIES

- Managing of multiple projects at once in a fast paced environment.
- Form and concept development / sketching.
- 3d modeling and rendering via CAD software.
- Mechanical problem solving.
- Working with project managers and engineers to assist factories in design manufacture execution.
- Building of prototypes and mockups using handtools, powertools, 3d printers, and laser cutters.
- Preparing technical drawings for international as well as domestic production facilities.

CLIENT LIST

Adidas	Nautica
Tag Heuer	Victorinox
Scuderia Ferrari	Bulova
Tiffany & Co.	Harry Winston
Movado	Levi's
Quiksilver	Ebel
Timex	Van Cleef & Arpels
Oakley	Seiko
Kodak Alaris	Casio

EXPERIENCE

January 2015 - Present

BL Industrial Design
Denver, CO

I assist in all phases of industrial design related services on a daily basis to three different companies in various niches, via remote work as a private contractor. I have successfully launched to market a Kodak Alaris document scanner while working with BZDesign Inc. and engineers at Kodak Alaris. With Pacteam America I worked with project managers to conceptualize and helped bring to market the Casio G-Shock US display program in addition to over 50 other projects realized into the commercial space.

September 2010 - December 2014

Pacteam America
Paramus, NJ

As a senior industrial designer, I designed and prepared for mass manufacture packaging, visual merchandising displays, and store fixtures for many well known brands across a variety of specific industries including watch, eyewear, jewelry, and footwear. For the four years I was a part of Pacteam we increased our sales by 75%. In one instance my design work helped to land a Ferrari watch display program which ended up being a \$750,000+ ongoing account. I consistently took creative and technical design lead on many projects, while working closely with project managers. I successfully helped bring over 300 products through production and to market, during my time here.

SOFTWARE

PROFICIENT

SolidWorks
3d Studio Max
Adobe Photoshop
Adobe Illustrator
Keyshot6

SOME EXPERIENCE

Blender
Autodesk Fusion 360
Rhino 5
Adobe Indesign

ACTIVITIES / INTERESTS

- Climbed Mt. Kilimanjaro in June 2013, helping raise over \$15,000 for The Adventure Project, working to aid farmers in Kenya.
- Designing and building a uniquely styled blend of Adirondack / modern furniture with my father who owns and runs his own cabinet shop in Paterson, NJ
